

SEASONAL CHECKLIST / Storage preparation

ATV / UTV — Storage preparation

Match the year, engine, transmission, and differential requirements; fluids are not universally interchangeable.

Model: _____ Date: _____ Miles / hours: _____

- ☐ Record the model, mileage or hours, and storage date; find its maintenance and storage instructions.
- ☐ Clean and dry the machine; inspect for leaks and damage that should be repaired before storage.
- ☐ Check engine oil and filter service and the separate transmission and differential requirements.
- ☐ Follow the manufacturer's fuel-storage instructions; measure any compatible treatment from its current label.
- ☐ Inspect the air filter and lubricate only the points specified by the manufacturer.
- ☐ Arrange battery care, tire checks, and a suitable storage location; record any work deferred until restart.

AMSOIL discusses rust and corrosion protection during storage. The checklist adds planning prompts; the equipment manual supplies the actual service procedure.

Notes / next service: _____

SEASONAL CHECKLIST / Return to service

ATV / UTV — Return to service

Match the year, engine, transmission, and differential requirements; fluids are not universally interchangeable.

Model: _____ Date: _____ Miles / hours: _____

- ☐ Remove storage covers and inspect intake, exhaust, and wiring for obstruction or damage.
- ☐ Check the required engine and drivetrain fluid levels and look for leaks.
- ☐ Inspect tires, brakes, steering, throttle operation, and drive components as directed by the manual.
- ☐ Check the battery, air filter, fuel system, and safety equipment before starting.
- ☐ Follow the manual's restart procedure; resolve abnormal operation before riding.
- ☐ Record mileage or hours and set the next service checkpoint.
