

SEASONAL CHECKLIST / Storage preparation

Pickup — Storage preparation

Gasoline or diesel pickup; adapt each item to your engine, climate, and owner's manual.

Model: _____ Date: _____ Miles / hours: _____

- ☐ Record mileage, service date, required oil specification, and planned restart date.
- ☐ Check oil and filter service against the vehicle's schedule; choose an approved viscosity for expected temperatures.
- ☐ Check coolant protection, battery condition, tires, lights, and wipers using the vehicle manual.
- ☐ Follow the engine manufacturer's fuel-storage procedure. Match any treatment to gasoline or diesel and its current label.
- ☐ For diesel winter use, review cold-flow prevention before cold weather arrives; preventive treatment does not repair already-gelled fuel.
- ☐ Arrange battery care and storage checks using the manual; record any leaks or repairs needed before driving.

For diesel cold-weather preparation, read the existing Clearwater seasonal guide and the AMSOIL Diesel Cold Flow label. Do not substitute a gasoline stabilizer.

Notes / next service: _____

SEASONAL CHECKLIST / Return to service

Pickup — Return to service

Gasoline or diesel pickup; adapt each item to your engine, climate, and owner's manual.

Model: _____ Date: _____ Miles / hours: _____

- ☐ Review the storage record and remove any covers or obstructions before starting.
- ☐ Inspect for leaks, damaged hoses, wiring damage, and obstructions at the air intake and exhaust.
- ☐ Check oil, coolant, and other specified fluid levels with the vehicle in the condition required by its manual.
- ☐ Check tire pressures and condition, battery, lights, wipers, and brakes before road use.
- ☐ Follow the manufacturer's restart procedure; investigate warning lights, unusual noises, or leaks before driving.
- ☐ Record current mileage and the next service date or mileage from the applicable schedule.

For diesel cold-weather preparation, read the existing Clearwater seasonal guide and the AMSOIL Diesel Cold Flow label. Do not substitute a gasoline stabilizer.
